

GRENE D Scholars attended a day of Leadership Development Training with Founder / Director Dr. Dessima Williams

Grenada is in need of a steady supply of empowered young leaders. To see that this happens GRENE D have placed students with mature mentors that would provide assistance throughout various stages of their school and career path. This involves tutoring, encouragement, support and other personal growth and leadership modeling. GRENE D also help with Leadership Development Training which helps students in their life skills, history of their country and other personal development sessions that can help them spiritually, physically and mentally grow and emerge as leaders.

GRENE D continues to be a catalyst for youth empowerment not limited to academics, with the students and the community at large.
